Dear DataVerify Customer:

Due to the impacts of COVID-19, and the general health and safety measures that federal and state executives have put in place, we are beginning to see delays in typical turn times for the Tax Transcript, SSA Verification, and Flood Zone Determination products.

While DataVerify has made adjustments to address what we can, like moving workforces remote and reallocating resources, there are other factors that are beyond our control. Please understand that significant delays in turnaround times should be expected and we may even experience the inability to complete certain requests in these unprecedented times.

DataVerify appreciates your patience and cooperation as we continue to operate throughout this new environment.

Thank you.
